

Abstract

The alkoxylate mixtures comprise alkoxylates of the formula (I)

5

where

10

A is ethyleneoxy,

B, in each case independently, are C₃₋₁₀-alkyleneoxy or mixtures thereof,

15

groups A and B being present in the form of blocks in the stated sequence,

p is a number from 0 to 10,

n is a number greater than 0 to 20,

m is a number greater than 0 to 20,

20

q is a number greater than 0 to 10,

p + n + m + q is at least 1,

from 70 to 99% by weight of alkoxylates A1, in which C₅H₁₁ is n-C₅H₁₁,
and

25

from 1 to 30% by weight of alkoxylates A2, in which C₅H₁₁ is
C₂H₅CH(CH₃)CH₂ and/or CH₃CH(CH₃)CH₂CH₂,
being present in the mixture.
